

## **Coimbra Life Sciences Group (CLSG) Master's Programs "Master in Cancer Biology"**

Eleven Universities of the Coimbra Group participate in the  
**"Master's Program in Cancer Biology"**  
An initiative of the Coimbra Life Sciences Group

### **What it is**

A proposed action aimed at increasing the excellence and competitiveness of our postgraduate/master students in the context of the Life Sciences. Thus, CLSG offers to master students in the cancer biology field (or related), the opportunity to develop their practical training/research project (or part of it) in one of the partnering Universities participating in the Program. Students can also attend cancer-related lectures in the foreign University during their practical training.

### **General aims**

- To develop active networks in the cancer research area.
- To share training activities and technologies with the goal to boost the quality and competitiveness of bio-scientific education and training.
- To introduce students to an interdisciplinary approach to cancer research, from basic to clinical level.

### **Participating Universities**

Montpellier (France), Würzburg (Germany), zu Köln (Cologne, Germany), Turku (Finland),  
Abo Akademi (Finland), Vilnius (Lithuania), Tartu (Estonia), Coimbra (Portugal), Pavia (Italy),  
Barcelona (Spain) and Salamanca (Spain).

**Consult the broad range of research projects and cancer related subjects offered by each University**
