Genotype-to-phenotype maps: from genome screens to missing players in cell biology

The LabUM EpiGenMed network is pleased to announce the first in the 2023-2024 series of eight prestige seminars. Attendance is free but limited to the first 200 arrivals!

Thijn Brummelkamp, EMBO Gold medal winner in 2013, has pioneered the implementation of functional genomics to uncover new gene function. His talk will be followed by drinks and a meeting with students and early career scientists.

**Friday 27th January at 14h00, New Faculty
of Medicine of the University of Montpellier**
